The Healing Touch

As the story progresses, Derek Stiles' extraordinary power, the Healing Touch, will become available to you. Invoking the Healing Touch will slow down time, allowing you to accomplish more in a shorter period of time and making situations that may have previously seemed very dire more manageable. It can only be used once per operation, though, so don't use it frivolously.

Invoking the Healing Touch:

When the Healing Touch becomes available, a star icon will appear in the bottom left hex. Use the stylus to touch the Healing Touch icon, or press the L or R Button, and then draw a star on the Touch Screen quickly and accurately over the operation field. If successful, a special gauge will appear below the patient's vitals, indicating that the power is in effect. When the gauge depletes, the power will end, and you will return to normal operating conditions.

Note: Some operations may require you to implement the Healing Touch in order to progress.

The Results Screen and Game Over

When an operation is completed, the Results Screen will appear before the story continues. If the operation fails due to exceeding the time limit or allowing the patient's vitals to drop to zero, it will be game over, and the Results Screen will not be displayed. You will have the opportunity to restart the operation from the beginning or to return to the Episode Select Screen.

The Results Screen Confirms your Score and Rank: In the Results Screen, your Stage Score, Vital Bonus, and Time Bonus points will be added to created a combined total score. Special Bonus points are then awarded for completing the operation while meeting certain objectives. The total score for the operation is then added up, and you are assigned a letter grade representative of this score.

How Stage Score is calculated:

MISS: Correct your mistake

OK: Continue the operation

Score Breakdown	
High	Cool
	Good
Low	Bad

The results of operations that are successfully completed can be viewed on the Episode Select Screen. The upper screen displays your current high score, and the letter rank you achieved is displayed next to the name of the episode on the Touch Screen.
